## DAVITA AND OUR TRILOGY OF CARE

Chronic kidney disease (CKD) affects approximately 31 million Americans or one in six American adults. The vast majority of those with CKD don't learn of their condition until it's too late to reverse its course.

Through our Trilogy of Care—caring for our patients, our teammates and our world—DaVita® touches more lives every year in hundreds of local and global communities.

### CARING FOR OUR PATIENTS

DaVita's holistic approach to kidney care has consistently delivered clinical outcomes, treatment options and value-added services that help improve patients' quality of life.

### CARING FOR OUR TEAMMATES

When we create a thriving, sustainable community for our teammates, they in turn are inspired to help others—such as through the DaVita Village Network, which provides limited contribution-matched funds to teammates during a personal crisis.

### CARING FOR OUR WORLD

The meaning of the name DaVita, "giving life," reflects our commitment to operating sustainably and to nurturing the lives of patients around the world through programs such as nonprofit Bridge of Life—DaVita Medical Missions™, which brings hope, treatment and education to underserved overseas communities.
