

Clinical Outcomes

At DaVita, we are an industry leader in clinical outcomes, yet we are always looking to improve our centers and will continue to do so. We have not wavered from this goal for 16 years, and we will keep working hard to help our patients have the best possible quality of life.

FAST FACTS

- For the third year in a row and since the inception of the program, DaVita Kidney Care has been recognized as a clinical leader in quality in the Centers for Medicare and Medicaid Services (CMS) Five-Star Quality Rating System.
- DaVita led the industry in 2015 Medicare QIP performance scores: 1.5 percent of DaVita facilities received a QIP penalty in 2015 vs. 7.4 percent for the industry as a whole. DaVita has outperformed the industry since QIP started in 2012.²

KIDNEY SMART

Kidney Smart is a no-cost, chronic kidney disease (CKD) education resource that was created by a multi-disciplinary team of health care providers and health education professionals. There are nearly 2,000 certified Kidney Smart educators and a wide array of class offerings across the United States in addition to online options.

Since the program's inception in 2013, approximately 95,000 people have attended a Kidney Smart class. Classes are 90 minutes long, are open and available to the public, and can help people with CKD stages 3, 4 and 5, as well as their friends, family and caregivers become better informed about their options.

During class, attendees learn about the causes of kidney disease and how to delay its progression, the variety of available treatment options, the important role continuing to work may play in helping people with CKD remain healthier and maintain an improved quality of life, available diet resources that can impact CKD progression, and how insurance counselors can help navigate the myriad of coverage options.

VILLAGEHEALTH

DaVita VillageHealth, the integrated care division of DaVita Kidney Care, dramatically impacts the lives of more than 20,000 patients each month through its integrated care programs. Through health plan and health system partnerships, as well as our Chronic Special Needs Plans (C-SNPs) and ESRD Seamless Care Organizations (ESCOs), DaVita VillageHealth takes clinical and financial accountability for late stage chronic kidney disease (CKD) and end stage renal disease (ESRD) patients' total care. As a result, patients receive 24x7 access to a renal nurse care manager; education and coaching to help them reach their personal health goals; and care coordination inside and outside of the dialysis clinic-across nephrologists, specialists, PCPs, hospitals, and dialysis center care teams.

DaVita VillageHealth patients live healthier and higher quality lives. The program also improves clinical outcomes and reduces total cost of care. Results include:

- 80% of patients say they are more engaged in their health care.⁴
- 29% fewer patient days in hospital.⁵
- 20% lower hospitalization rate than industry average.⁶
- 27% lower readmission rate than industry average.⁶
- 66% CVC rate reduction.⁵
- Up to 18% addressable cost savings.⁶
- Up to \$12k per patient per year savings.⁶

1. According to 2015 data, reported in 2017, from the Centers for Medicare and Medicaid Services' (CMS) Five-Star Quality Rating System. Although many DaVita centers outperformed other centers, only certain DaVita centers received a Four- or Five-star rating.
